PRACTICE

Refining and Testing Joint Fact-Finding for Environmental Dispute Resolution: Ten Years of Success

329

Scott T. McCreary, John K. Gamman, Bennett Brooks

The authors discuss the benefits of using joint fact-finding in mediating environmental disputes. Through the presentation of three case studies and a general discussion of insights gained from ten years of experience, they provide a fertile understanding of the best practices for joint fact-finding in complex environmental disputes.

Money and Mediation: Patterns of Conflict in Family Mediation of Financial Matters

349

Michael Benjamin, Howard Irving

The authors present five distinctive patterns of conflict about money issues that are commonly found in family mediation. Their discussion of the nature of these patterns and their implications for practice provide valuable insights in an area not commonly addressed in the family mediation literature.

Beyond the Dominant Narrative: Intimacy and Conflict in Lesbian Relationships

363

Diane M. Felicio, Michelle Sutherland

It is rare to find careful attention to intimacy and conflict in lesbian relationships in the mediation literature. The authors provide an intriguing discussion of the scholarship about lesbian relationships and its implications for mediators working with lesbian couples involved in family mediation.

RESEARCH

- Conflict Education and Special-Needs Students, Part Two:
Improving Conflict Competence and Emotional Competence 377

Andrea Bodtke

Conflict resolution education programs for special-needs students are increasingly used to teach students conflict-related skills and orientations. This article reports on a research project that investigated the efficacy of one conflict resolution education program in a special-needs population. Results are presented in terms of the program's impact on students' perspective-taking, hostile attribution, emotional management, and aggressiveness.

- Evaluating Environmental Mediation: Results from a Waste Management
Conflict in Germany 397

Katharina Holzinger

This article presents an in-depth report of an environmental mediation process in Neuss County, Germany. The author provides detailed case information about the dispute, presents a taxonomy of procedural and results-related criteria critical for environmental mediation, and presents results of the case in light of these criteria.
